#### **About Us**

After years of work in technology and design, and pursuing academic achievement at the university, a clear gap became evident in the curriculum: a lack of comprehensive academic references and a scarcity of such knowledge in the Arabic language.

This observation led us to conduct a poll among university students, a majority of whom confirmed the pressing need for scientific courses to serve as a foundational resource for academic learning.

#### **Our Vision**

- We are committed to translating knowledge from English and other languages into Arabic, while preserving precise scientific concepts and expressions.
- We re-draft academic courses, and structure and design content in innovative ways that help convey complex concepts and information in an accessible manner.
- Our goal is to launch a unified digital platform, available via the internet and mobile applications.

## Meaning of the logo

A: The first letter of the Latin alphabet, also representing the beginning of "Art" and "Arabic".

1: The first number, symbolizing leadership and priority in the field.

Media: An inclusive term encompassing all the core and sub-fields that will be the focus of our research.

The Shape: A combination of the letter A and the number 1, forming the letter M in the shape of a tall mountain peak, symbolizing ambition, excellence, and reaching the pinnacle of knowledge.

The Cursor: Added to signify that our work is entirely digital.

The Colors: Chosen to represent the contrast between knowledge and ignorance. Yellow symbolizes light and knowledge, while gray represents ignorance and darkness.

### **Logo Positions**

- The logo is always placed in the center of the content.
- This placement symbolizes our role as the central link, positioned at an equal distance between sources of academic knowledge and the audience that will utilize this knowledge in their work.
